

Low Cost Hosting High Availability

Call us now on 1300 393 835

Exetel's NSW Hosting PoP is located in a totally secure, state of the art, commercial data centre in the Sydney CBD. The facility exceeds Australian Standard AS 2834-1995 or a 'Class A' computer facility.

Redundancy Covered? Totally.

Exetel's PoP has been designed redundantly in a way that all services will continue to operate if any single component fails. In building the NSW PoP, Exetel has used the very highest specification equipment from the best manufacturers:

Routers	Cisco Systems Inc.
Switches	Cisco Systems Inc.
Servers	All hosting servers are high end Dells with mirrored SCSI Disk Arrays

High Bandwidth. Happy Customers.

The Exetel NSW PoP is connected to and from Exetel users via multiple redundant 10 Gigabit Ethernet links from Nextgen Networks, AAPT and Optus Wholesale, and to and from other users, in Australia and anywhere else in the world using bandwidth from AAPT and Optus. Both the Customer Access and the Internet ingress/egress bandwidth are continually provisioned at levels well above the peak usage of all users at all times.

Service availability when you want it.

The Exetel hosting services have been designed to provide low cost hosting with high availability. The servers provide all of the features required for a professional small/medium business site.

Full hardware, software and data redundancy is maintained at all times as 'insurance' that in the worst possible case scenario means that services can be restored in the shortest time.

Painless, Fast Set Up.

It takes only 48 hours to set up your web site with Exetel and all that is required is that you complete the online application form that can be found using the "Order Hosting Services" link in the menu bar on the left of this web page.

You simply provide us with the basic details of your website's name and, if appropriate, the details of where it is being hosted and submit it to Exetel. A qualified engineer will then set up your account and web site details and send you a concise email giving you the address and instructions on how to upload your site, modify and maintain it.

If you need further assistance you can call the engineer responsible during working hours on 02 8030 1050 or email him/her at any time.

Very Low Cost Web Site Hosting.

Advanced Data Centres Across Australia.

Exetel operates its core network from fourteen state of the art data centres across Australia, and New Zealand, and has greatly expanded the capacity we have in these various facilities in recent years.

Our data centres are some of the newest and most advanced datacentres in Australia. Centres such as Equinix's SY3 and NextDC's M1 / B1 facilities deliver redundancy on power and cooling with Exetel providing redundant internet feeds into both facilities. As part of our service you will have 24 hour access to equipment

in these facilities. We are also able to seamlessly integrate a colocation product with an existing Exetel Managed Network.

Our colocation facilities are the perfect place for you to locate their mission critical equipment and Exetel has space and power options for almost any requirement you might have.

Some of the options available include the following:

| Secured rack allocation |
|-------------------------|-------------------------|-------------------------|-------------------------|-------------------------|-------------------------|-------------------------|
| Half rack (45RU) | \$0.00 | 36 months | \$2,275.00 | 2kVA | 25Mbps / 25Mbps | Unlimited |
| Half rack (45RU) | \$0.00 | 36 months | \$3,025.00 | 3kVA | 50Mbps / 50Mbps | Unlimited |
| Half rack (45RU) | \$0.00 | 36 months | \$3,500.00 | 4kVA | 50Mbps / 50Mbps | Unlimited |
| Half rack (45RU) | \$0.00 | 36 months | \$5,620.00 | 6kVA | 100Mbps / 100Mbps | Unlimited |

If you need further information, or would like to organize a tour of either facility, and see how your business can benefit from colocation, please call our sales team on 02 80301040 ,or email corporatesales@exetel.com.au
